Vol. VII, No. 11

November 1963

OCTOBER UNIFORM PRICE \$4.14

Dairy farmers will receive a uniform price of \$4.14 for October 1963 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7 cents, for each one tenth percent that tests vary above or below the 3.5 percent standard. The minimum price is subject to a 4 cent per hundred-weight marketing service deduction, together with the authorized hauling charge. This uniform price is 11 cents above the September uniform price and 10 cents above the price of a year ago.

PRODUCER RECEIPTS

Utilization of producer receipts in Class I was higher in October than it has been for any month since 1960. Daily average receipts were up 3.7 percent over September, but were one-half percent off from a year ago. The daily average pounds per herd is 791 pounds, which is 50 pounds per day more than it was a year ago. This means that 637 producers on the market are producing almost as much milk as 684 producers were a year ago. The average test of producer milk is .07 percent less than it was in October 1962. For the past two months, the 1963 average test has been higher than the 1962 average test. The unusually warm October this year undoubtedly kept the test from increasing.

CLASS I SALES

The average daily sales of Class I products is almost the same as it was a year ago. Some Class I sales have been lost to other order handlers, but some have been gained by handlers under this order selling into other marketing areas. The main loss of Class I sales in this area to other order handlers could be the fact that local handlers do not have any of the new paper gallon packaging machines now being used in various places. Increase in Class I sales in the fall usually comes in September, but this year the large increase came in October.

CLASS I PRICE

The Class I price for the November 1963 delivery period will be \$4.45 per hundred-weight for 3.5 percent milk. This price was computed by adding \$1.30 per hundred-weight to the basic formula price (\$3.15), with a zero supply-demand adjustment. The supply-demand adjustment for the December 1963 delivery period will be a plus two cents.
